TESTIMONIAL:

“Working with Danna completely changed my life. She is the reason I was able to get back on my feet when I had been physically broken and mentally lost. And based on her recommendation we focussed on nutrition and mental wellness.

For nutrition we looked at my eating habits, what I liked and didn't like. Danna was able to recommend sound detailed nutrition plans that were easy to follow and sustainable, as well as specific for me and my lifestyle.

I could see how this fit into my mental wellness. We spent a lot of time talking about where I was and where I wanted to be. The daily check-in's, the well thought out probe questions, as simple as they were, really helped me reflect on my answers. It was a discovering journey that I will forever be grateful for and to this day a year later I still practice”.
